Note	*This building is decommissioned and is no longer being used as a school.				

《Air Radiation Level Measurement in Sendai》

○Air Radiation Level is measured with radiation detectors.

○Measurement Stations

63 stations such as Schools, Nursery Schools, and Parks
(Please see the left chart for details)

○Frequency : Once a month

○Measuring Points

Elementary Schools, Nursery Schools, and Parks : 50 cm above the ground
Junior High Schools & High Schools: 1 m above the ground

《Comments》

If radiation levels per hour do not exceed 0.23μ Sv, the radiation level per year due to the Tokyo Electric Power Company's Fukushima Nuclear Power Plant Incident does not exceed 1mSv per year, which is below the limit which is seen as an acceptable dose for an individual as advised by the International Commission on Radiological Protection. The standard radiation limit does not include natural radiation or medical related doses.
